

Module 3: Climate Change Mitigation

From Boswell, Greve and Seale:

- What is a Greenhouse Gas Emissions Inventory and how is it conducted?
- What are key challenges in planning for climate change mitigation?
- What are key policies and strategies that local governments can take to reduce greenhouse gas emissions?

From Wheeler and Bassett and Shandas:

- What are characteristics of early stage state and local climate change planning?
- What are some of the most interesting and/or promising approaches being taken around the country so far?
- What has been the balance of climate change mitigation and adaptation planning to date?
- What is the role of planners in early era climate change mitigation planning?
