

Module 4: Climate Change Adaptation

From Boswell, Greve and Seale:

- What are key steps in the process of planning for climate change adaptation?
- What are key challenges in planning for climate change adaptation?
- What are key policies and strategies that local governments can take to reduce risks from climate change impacts?

From Preston et al., Bierbaum et al., Woodruff and Stults, and Schrock et al.:

- In early climate change adaptation planning, what are some the strengths and weakness in the plans created to date?
- What factors appear to influence the variation in climate adaptation plans to date?
- What is the role of planners in adaptation planning to date and what could it be moving forward?
- How are equity concerns being addressed in climate change planning?
