

The Resurgence of **Race** in
Europe:
Perceptions of Discrimination
Among Immigrants in Spain

received?

How will immigrants be

Will **race** be relevant?

Questioning race

- “Scholarly imposition” of the “American worldview” as the “universal point of view” (Bourdieu and Wacquant 1999).

Questioning race

- “Scholarly imposition” of the “American worldview” as the “universal point of view” (Bourdieu and Wacquant 1999).
- While race or phenotype constitutes a “bright boundary” in the U.S., particularly for immigrants with darker skin, **religion** plays this role in Western Europe (Alba 2005).

Research Questions

Questions

1. What **reasons** do immigrants report to explain their discrimination experiences in Spain?
 - Nationality, Religion, or Race?
2. How do these reports change with **acculturation**?

Roadmap

- a) Literature Review:
 - discrimination perceptions
 - race vs. culture debate
 - immigrant adaptation
- b) My findings
- c) 1st Data set on 1.5 and 2nd generation immigrant youth
- d) 2nd Data set on 1st generation adult job seekers
- e) Discussion and conclusions

Perceptions of Discrimination

- Widely used in sociology and social psychology (Brub 2008; Safi 2010)
- Not necessarily experiences but understandings of groups' experiences (Dion and Kawakami 1996; Taylor, Wright, and Porter 1994)
- Perceived social boundaries (Alba 2005); school performance (Tracey and Sedlacek, 1987); life satisfaction (Safi 2010); political mobilization (Okamoto 2003)

Race, nationality and religion

- **Ethnicity**: subjective feelings of belonging based on the belief in shared culture and common ancestry (Wimmer 2008).
 - Race: Social significance given to perceived physical features (Goldberg 2002; Telles 2004).
 - Culture: learned behavior (Sewell 1999); configuration of symbols, codes, and ritual practices that provide strategies of action (Swidler 1986).

Race, nationality and religion

- Ethnicity: subjective feelings of belonging based on the belief in shared culture and common ancestry (Wimmer 2008).
 - **Race**: Social significance given to perceived physical features (Goldberg 2002; Telles 2004).
 - **Culture**: learned behavior (Sewell 1999); configuration of symbols, codes, and ritual practices that provide strategies of action (Swidler 1986).

Discrimination and Immigrant Acculturation

- Classic assimilation
- Conflict theory
- **Segmented assimilation**

Why Spain?

- Cradle of western preoccupation with ancestry and blood purity (Fredrickson 2002); caste systems in L.A.
- Elites reject “race”, embrace civic model (Díez Medrano 2005; Molina 1994)
- Race rejected due to biological connotations; State forbids collection of racial data (Flecha 2001)
- With increasing migration, will race become relevant again?

The case of Spain

- Highly diverse flows; religious differences thought to drive native opposition to immigrants (Aparicio 2007; Rodríguez Álvarez 2009).
- Limited empirical data (Díez Nicolás and Lafita 2001; Safi 2010)
- Race and culture important for Spaniards (Bail 2008)
- Wearing headscarves, dark skin (Agudelo-Suárez et al 2009)

Findings: Sneak Peak

1. Religious discrimination is **rare**
2. Cultural discrimination declines with acculturation
3. Racial discrimination increases with acculturation for visible minorities

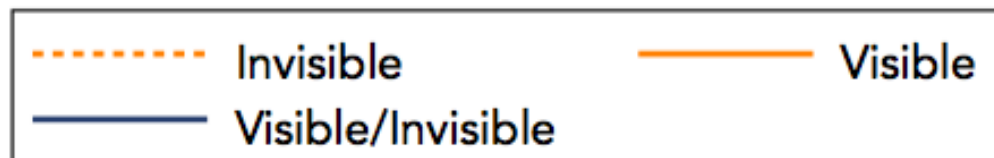

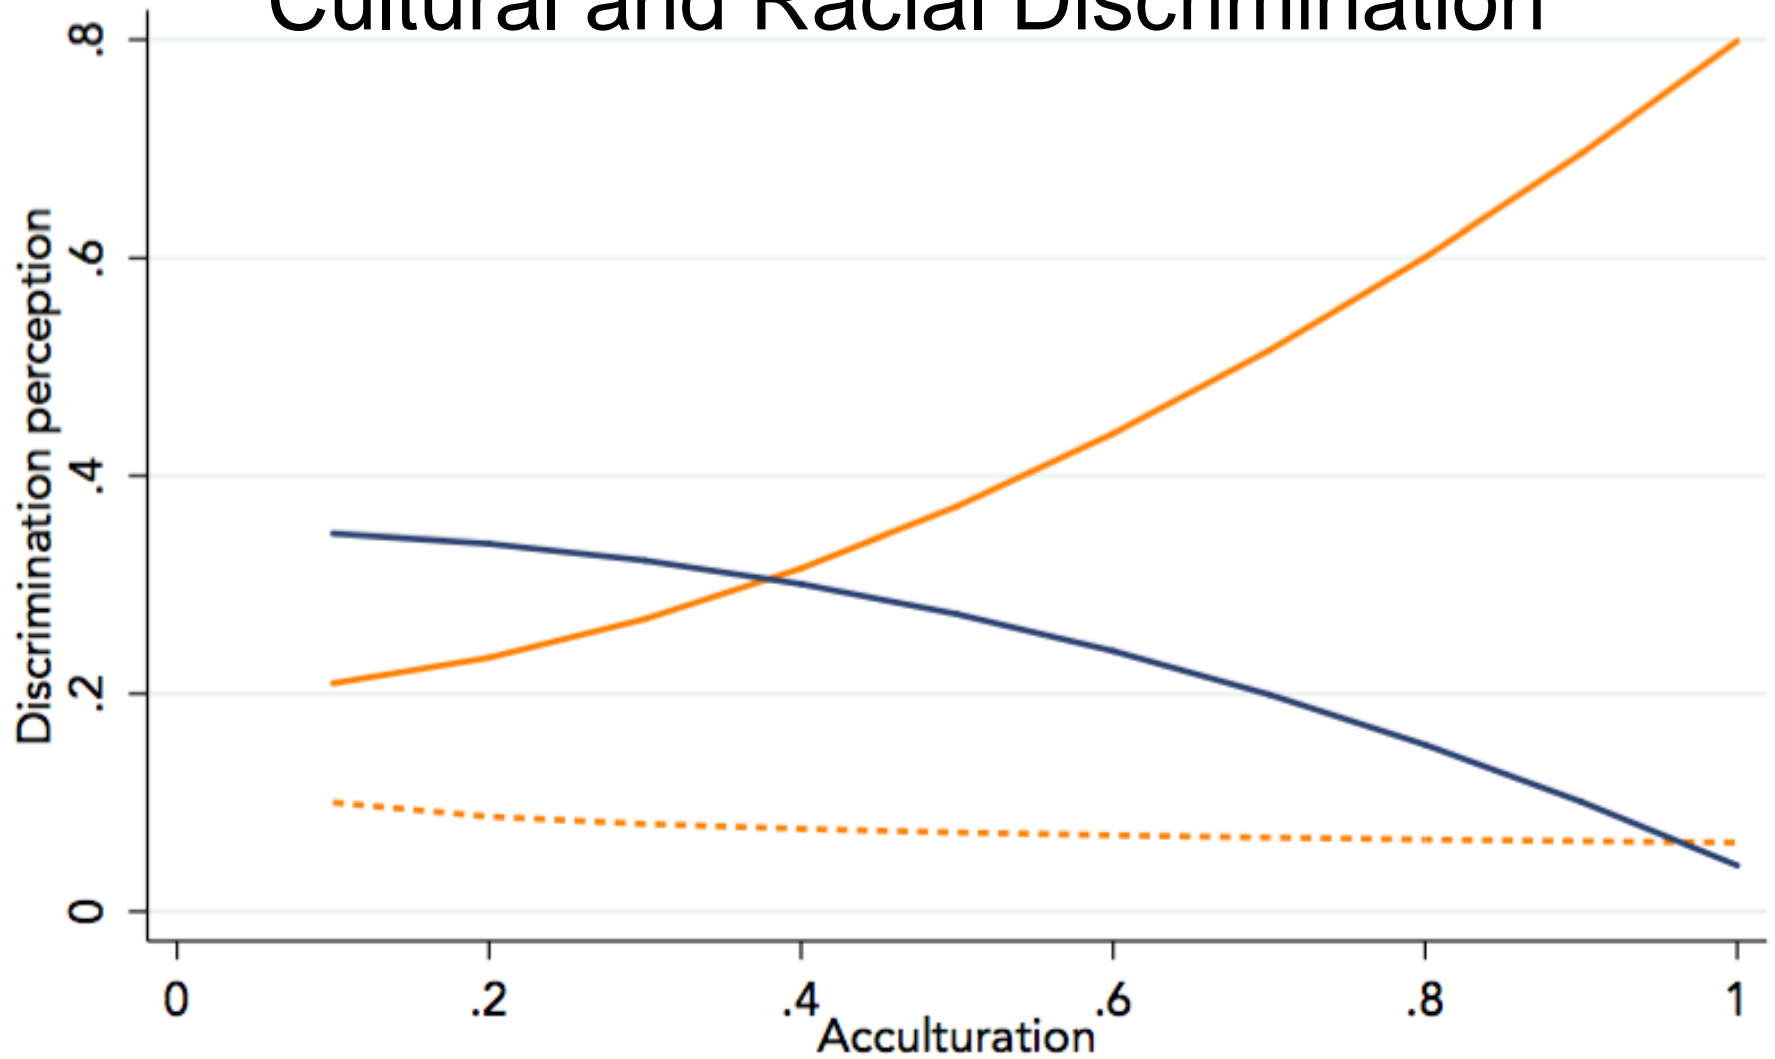

Findings: Sneak Peak

1. Religious discrimination is rare
2. Cultural discrimination **declines** with acculturation
3. Racial discrimination increases with acculturation for visible minorities

Findings: Sneak Peak

1. Religious discrimination is rare
2. Cultural discrimination declines with acculturation

Acculturation and Perception of Cultural and Racial Discrimination

Data set I

- Longitudinal Study of the 2nd Generation (ILSEG) directed by Alejandro Portes (Princeton University and Instituto Ortega y Gasset)
- Representative sample of immigrant-origin secondary school students in Madrid and Barcelona
- Mean age: 13.9 years
- 5966 1.5 generation, 909 2nd generation
- Multiple national origin groups

Question

For what reason have you been rejected or not treated the same as others?

- I haven't been **rejected** or treated differently than others
- Due to my nationality
- Due to my race
- Due to my religion

Further questions

Further questions

- Could these results be driven by the young **age** of respondents?

Further questions

- Could these results be driven by the young age of respondents?
- Question **format** bias (closed-ended)?

Further questions

- Could these results be driven by the young age of respondents?
- Question format bias (closed-ended)?
- Do these patterns hold **beyond** the classroom?

Data set II

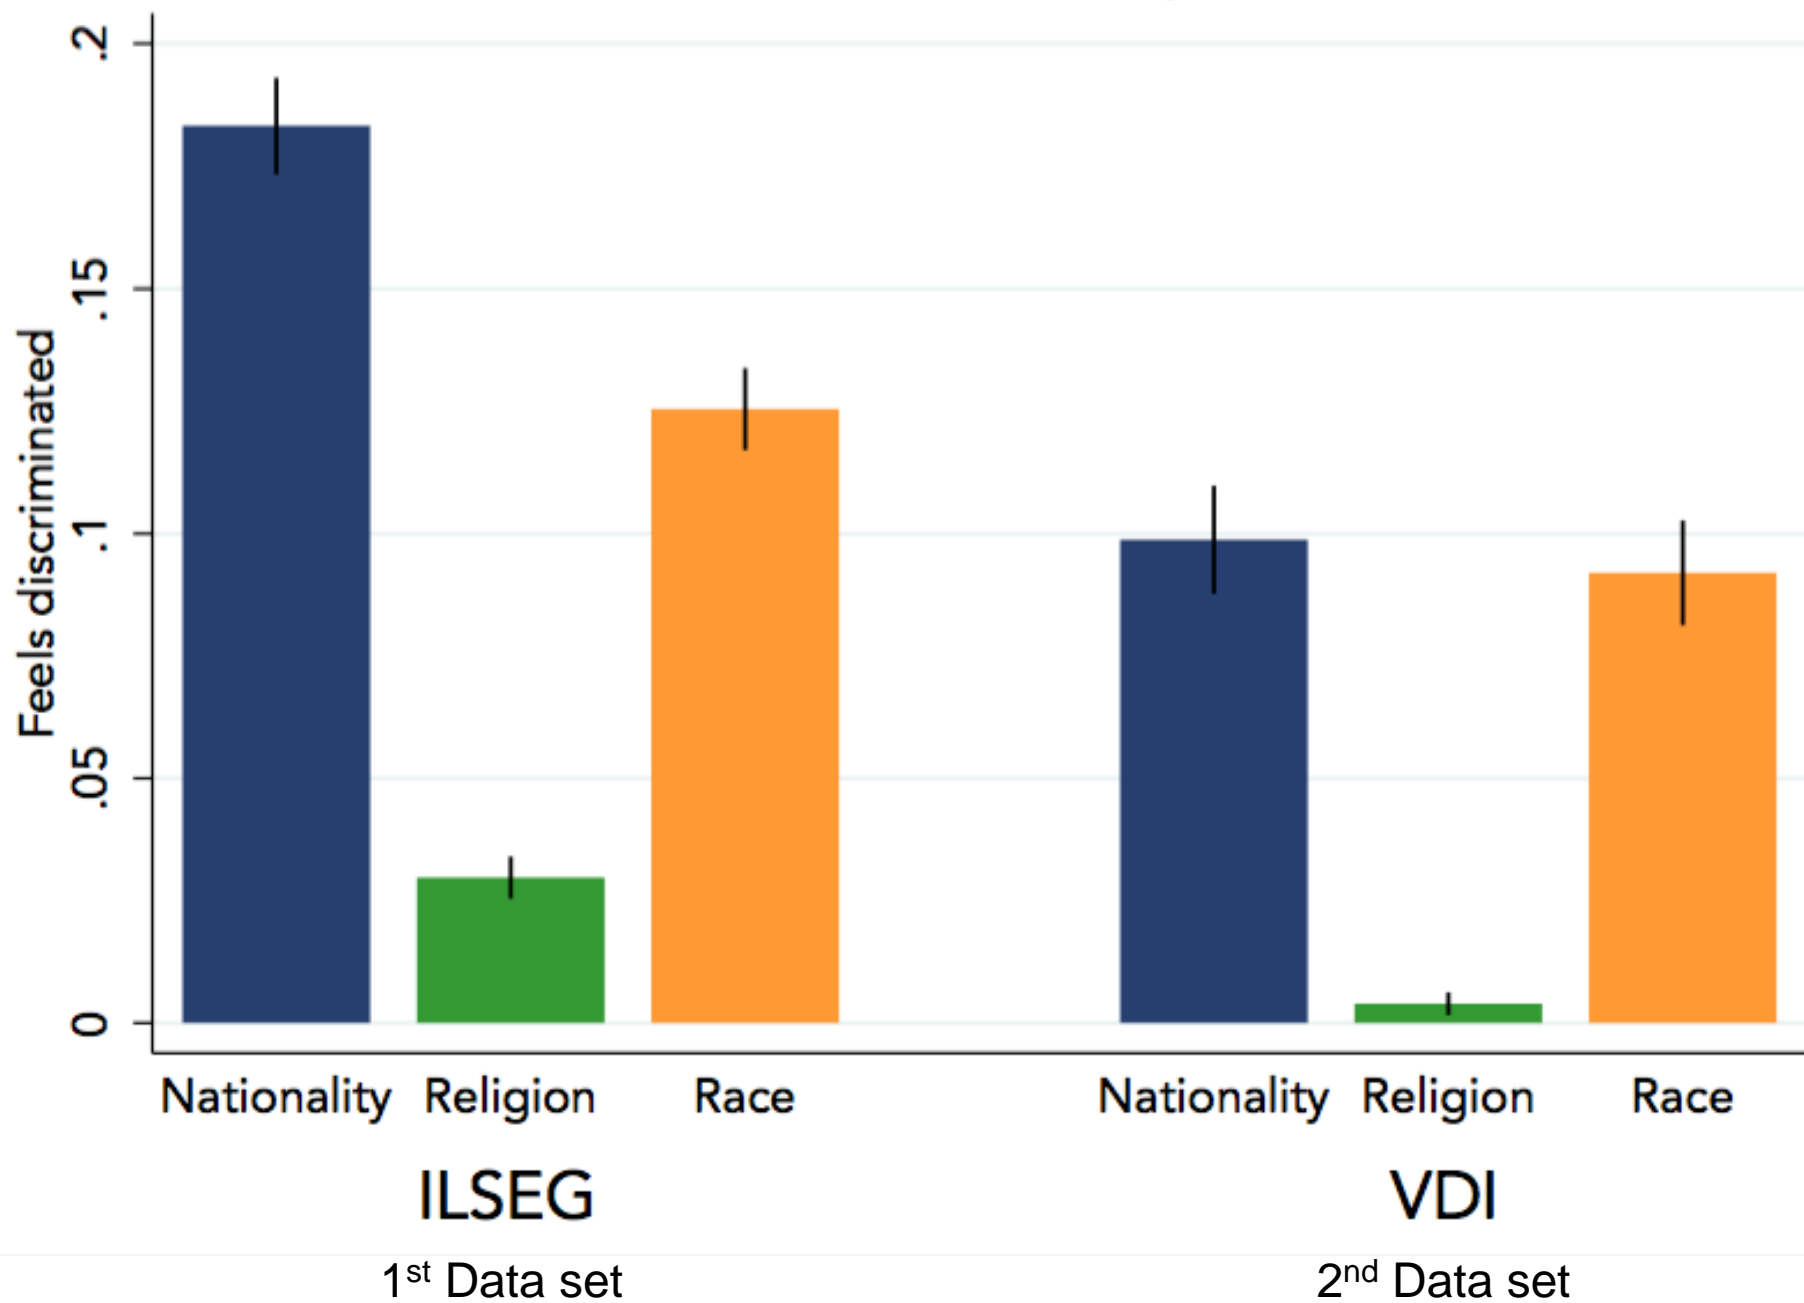

- “Voz de los Inmigrantes” (VDI), 2000 and 2004, Juan Díez Nicolás and María José Ramírez Lafita
- 3048 1st gen adult immigrants
- Catalonia, Madrid, Canary Islands, Andalucia, and Valencia
- Multiple national origins
- Open-ended question on job search problems

Question

*What do you think is the main **reason** why you have had difficulties finding a job when you have searched for one?*

(1st mention was recorded)

Discrimination and Immigrant Acculturation: Revisited

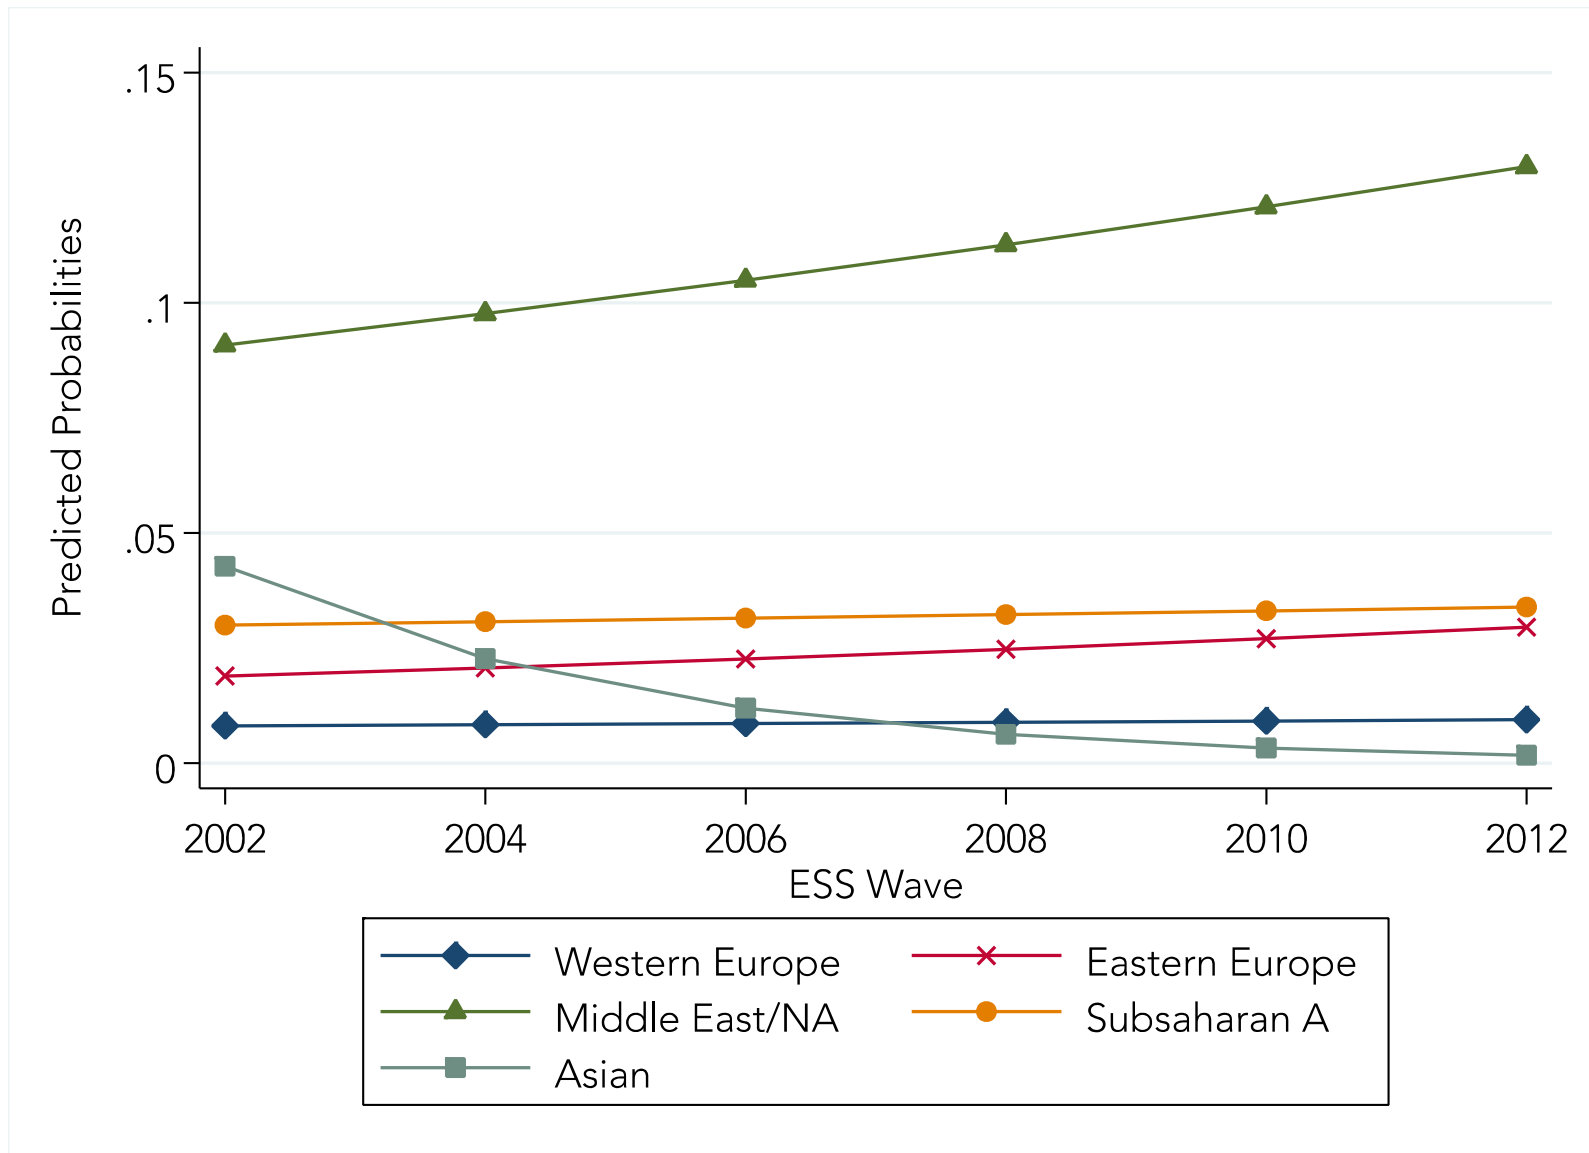

Discrimination and Immigrant Acculturation: Revisited

	Prediction	Findings
Classic Assimilation	<i>Less</i>	
Conflict Theory	<i>More</i>	
Segmented Assimilation	<i>Contingent</i>	

Discrimination and Immigrant Acculturation: Revisited

	Prediction	Findings
Classic Assimilation	<i>Less</i>	<i>Overall- Report Less cultural</i>
Conflict Theory	<i>More</i>	<i>Some- Report More racial</i>
Segmented Assimilation	<i>Contingent</i>	<i>Visible- Report More racial</i>

Predictive Probabilities of Reporting Religious Discrimination by ESS Wave (2002-2012)

- Estimates are adjusted for age, gender, education, community size, and generation

Predictive Probabilities of Reporting Racial Discrimination by ESS Wave (2002-2012)

- Estimates are adjusted for age, gender, education, community size, and generation

Conclusions

1. Religion, not a big concern for immigrants
2. Nationality and race more important
3. Acculturation matters
4. Visibility matters
5. Race: useful concept in Europe; U.S. not exceptional
6. Theories of immigrant adaptation not mutually exclusive
7. Racial ideas and meanings can diffuse up

Implications

1. Public policy: Important to collect discrimination and race data in Spain
2. Political consequences of emergence of racial discourse?
3. Changing ethnic logic of Spain and Europe?
